STANDARD OPERATING PROCEDURE · FIELD GUIDE SERIES

SOP-000

SOP Library Catalog and Index

Every standard operating procedure in the Field Guide Series in one place: how the library is numbered, what each procedure covers, which control frameworks it supports, and what changed in this edition.

SOP Library | 36 procedures | 802 pages

DOCUMENT ID	SOP-000
VERSION	1.0
EFFECTIVE	October 2026
AUDIENCE	Engineers, support staff, auditors and hiring managers reviewing the library
AUTHOR	Richmond Dieujuste, Principal Consultant

LEARNING OBJECTIVES

After working through this procedure you will be able to:

- Find the right procedure by technology family, by task, or by control framework.
- Read an SOP identifier and know its family and series at a glance.
- Trace the October 2026 renumbering from old identifiers to new ones.

Procedures	Families	Total pages	Edition
36	12	802	October 2026

CHAPTER 1

How the Library Is Organized

Each procedure is a self-contained field guide. It explains the concepts first, sets out the access and prerequisites, gives the procedure in the portal and as script, and ends with verification, rollback, troubleshooting and a short review. Every document is a sanitized reference edition: client names, hostnames, tenant IDs and ticket numbers are replaced.

1.1 Reading an identifier

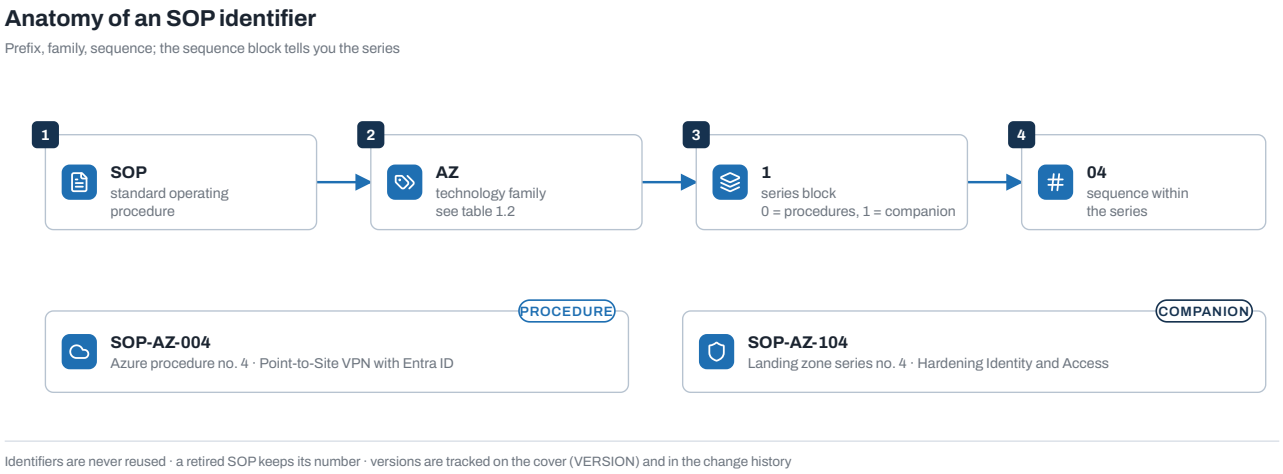

Figure 1. Reading SOP-AZ-104: Azure family, companion series (1xx), fourth document.

1.2 Families

Prefix	Family	Scope	SOPs	Pages
ID	Identity & Access	Entra ID policy, account lifecycle and privileged access.	2	47
EM	Endpoint Management	Intune enrollment, configuration, updates and administrative safeguards for Windows and macOS.	5	124
EP	Endpoint Agents & Protection	Deploying and retiring endpoint agents ahead of EDR.	2	43
SEC	Security Operations	Vulnerability remediation and incident response.	2	46
GOV	Governance & Compliance	Change control and objective evidence for regulated (GxP) systems.	1	25
AZ-0xx	Azure · Procedures (AZ-0xx)	Hands-on Azure builds: tenant, hardened VMs, cloning, VPN, backup and DR.	5	129
AZ-1xx	Azure · Landing Zone Build & Assessment Series (AZ-1xx)	Shorter companion series: landing zone as code, customer stamps, and the security assessment of that build.	8	96
M365	Microsoft 365	Collaboration platform migrations.	1	29
MIG	Cloud Migration	Moving on-premises servers to Azure.	1	27
LAB	Regulated Lab IT	GxP lab workstations, lab applications and compliance agents.	3	80
LBL	Label Printing	Zebra label printers: drivers, DPI and network integration.	2	51

Prefix	Family	Scope	SOPs	Pages
WIN	Windows Desktop Support	Tier 1–3 Windows troubleshooting and command-line tooling.	4	105

1.3 What every procedure contains

Chapter	What you get
Concepts You Need First	The model behind the task, with figures, so the steps make sense and can be adapted.
Access, Prerequisites and Planning	Minimum roles, licensing, a prerequisites checklist, and a risk table with status pills.
Methods	The procedure in the portal or GUI, then as PowerShell / CLI / KQL, then at scale (GPO, Intune, templates).
Verification, Rollback, Troubleshooting	A checklist that proves the result, the safe way back, and symptom › cause › fix tables.
Summary, Glossary and Review	Key points, review questions, terms and the control frameworks the procedure supports.

CHAPTER 2

Catalog

Grouped by family. Page counts include the cover. **New** marks procedures added in this edition.

2.1 Identity & Access

ID	Title and scope	Pages	Ver.
SOP-ID-001 · **New**	**Building a Conditional Access and MFA Baseline in Microsoft Entra ID**. Replace security defaults with a named, testable policy set: emergency access accounts, legacy authentication blocked, MFA for every user, phishing-resistant MFA for administrators and…	23	1.0
SOP-ID-002 · **New**	**Managing the Joiner-Mover-Leaver Account Lifecycle in Microsoft Entra ID**. Drive every account from the HR record: provision on hire with birthright access and a Temporary Access Pass, move access when the job changes, and on departure disable, revoke, recover…	24	1.0

2.2 Endpoint Management

ID	Title and scope	Pages	Ver.
SOP-EM-001	**Deploying Microsoft Defender for Endpoint to macOS with Intune**. Permissions, onboarding and the Defender app delivered five ways: Intune admin center, Graph PowerShell, Settings Catalog, local script and Jamf Pro, with verification down to mdatp health.	27	2.0
SOP-EM-002	**Enrolling macOS Devices into Microsoft Intune**. Company Portal self-enrollment, Automated Device Enrollment through Apple Business Manager, direct enrollment, and the admin prerequisites behind them, with a Graph PowerShell readiness…	27	2.0
SOP-EM-003	**Enforcing Multi Admin Approval for Intune Device Wipe, Retire and Delete**. A two-person rule for destructive device actions, configured in the Intune admin center or with Graph PowerShell (beta), with a request-notification flow and an audit of the…	24	2.0
SOP-EM-004 · **New**	**Provisioning Windows Devices with Windows Autopilot and Intune**. Register the hardware hash, target devices with a ZTDId dynamic group, build the deployment profile and Enrollment Status Page, then hand a sealed laptop to a user who signs in and gets…	22	1.0
SOP-EM-005 · **New**	**Managing Windows Update Rings and Patch Compliance with Intune**. Design deployment rings with Windows Update for Business, pin feature versions, expedite zero-day fixes, control drivers, and prove monthly patch compliance against an SLA, with a Patch…	24	1.0

2.3 Endpoint Agents & Protection

ID	Title and scope	Pages	Ver.
SOP-EP-001	**Deploying an Endpoint Management Agent (Tanium Client Example)**. Install, register and verify an endpoint management agent five ways: manual, silent command line / PowerShell, remote (PsExec, PowerShell remoting), enterprise (Intune Win32, ConfigMgr,…	21	2.0
SOP-EP-002	**Removing a Legacy Antivirus Agent Before EDR Migration**. A Trend Micro example: uninstall with the agent password, the vendor SCUT tool, the management console or scripted mass removal (PowerShell, ConfigMgr, Intune), then prove the endpoint…	22	2.0

2.4 Security Operations

ID	Title and scope	Pages	Ver.
SOP-SEC-001 · **New**	**Running a Vulnerability Remediation Program with Qualys and Microsoft Defender**. Discover, assess, prioritize, remediate, verify and report: two scanners reconciled into one queue, priorities set by exploitation rather than CVSS alone, SLAs by risk tier, scripted…	23	1.0
SOP-SEC-002 · **New**	**Containing a Compromised Microsoft 365 Account**. Respond to business email compromise and account takeover in Entra ID and Exchange Online: triage the alert, preserve evidence first, contain in a fixed order (sign-in, sessions,…	23	1.0

2.5 Governance & Compliance

ID	Title and scope	Pages	Ver.
SOP-GOV-001 · **New**	**Change Control and Objective Evidence for GxP and 21 CFR Part 11 Systems**. Classify a change, assess its GxP impact, plan the test and the rollback, get Quality approval with an electronic signature, implement in a window, capture objective evidence that would…	25	1.0

2.6 Microsoft Azure · Procedures (AZ-0xx)

ID	Title and scope	Pages	Ver.
SOP-AZ-001	**Creating and Securing a Microsoft Azure Tenant**. Tenant creation in the portal, then a security and governance baseline applied four ways: portal, a Graph + Az PowerShell template, Azure CLI / Bicep, and configuration-as-code.	28	2.0
SOP-AZ-002	**Deploying a Hardened Azure VM in a Data-Residency Region**. A Trusted Launch Windows Server VM with encryption at host, no public IP, backup and monitoring, built four ways (portal, Az PowerShell, Azure CLI, Bicep) and kept in-region by Azure Policy.	27	2.0

ID	Title and scope	Pages	Ver.
SOP-AZ-003	**Cloning an Azure Virtual Machine**. Snapshot → managed disk → new VM, done four ways (portal, PowerShell, Azure CLI, Compute Gallery), with secure access and full rollback.	19	2.0
SOP-AZ-004	**Azure Point-to-Site VPN with Microsoft Entra ID Authentication**. Give remote users an MFA-protected, OpenVPN tunnel into a private Azure network, built four ways (portal, PowerShell, Azure CLI, certificate authentication) plus the end-user connection…	28	2.0
SOP-AZ-005	**Designing Multi-Region Backup and Disaster Recovery in Azure**. Protect VMs and SQL across two EU regions with native Azure Backup (portal and PowerShell), Veeam Backup for Microsoft Azure and Azure Site Recovery, then prove it with restore testing.	27	2.0

2.7 Microsoft Azure · Landing Zone Build & Assessment Series (AZ-1xx)

ID	Title and scope	Pages	Ver.
SOP-AZ-101	**Building an Azure Landing Zone as Code**. Management groups, group-based RBAC, Azure Policy guardrails, central logging with an immutable archive and the hub network, built once from a template and inherited by every subscription.	17	1.1
SOP-AZ-102	**Deploying a Repeatable Customer Stamp**. One template per new customer: a private spoke network, Key Vault read by the VM managed identity, customer-managed disk keys and geo-redundant backup to the paired region.	15	1.1
SOP-AZ-103	**Threat Modeling an Azure Build with STRIDE**. Trust boundaries, data flows and attack surface of the deployed environment, reviewed at every boundary with STRIDE from the infrastructure and identity layer, without reading…	11	1.1
SOP-AZ-104	**Hardening Identity and Access in Azure**. Entra ID security groups, Azure roles at management group scope, Privileged Identity Management, Conditional Access and a role-to-permission matrix tested with real accounts.	11	1.1
SOP-AZ-105	**Scanning for Secrets and Supply-Chain Risk**. gitleaks, Trivy and Dependabot across the full repository history, a licence inventory and a Key Vault posture check.	10	1.1
SOP-AZ-106	**Assessing Network Segmentation and Container Hosting**. Multi-tenant segmentation, effective routes and NSG rules, public exposure and container host hardening, scored against CIS Azure Foundations and Defender for Cloud.	10	1.1
SOP-AZ-107	**Validating Logging and Proving Every Alert Fires**. Log source inventory, retention, alert rules for destructive actions, an audit trail of who, what and when, immutability, and a controlled test that fires every alert.	12	1.1

ID	Title and scope	Pages	Ver.
SOP-AZ-108	**Mapping One Build to Many Compliance Frameworks**. One control matrix and crosswalk across NIST CSF 2.0, NIST SP 800-53 R5, ISO/IEC 27001:2022, the HIPAA Security Rule and a PCI DSS boundary attestation, every row backed by hashed evidence.	10	1.1

2.8 Microsoft 365

ID	Title and scope	Pages	Ver.
SOP-M365-001	**Migrating On-Premises File Shares to Microsoft Teams and SharePoint**. Scan, remediate, migrate and cut over Windows file shares into Teams channels with Migration Manager, the SharePoint Migration Tool (GUI and PowerShell), and a scripted pre-migration…	29	2.0

2.9 Cloud Migration

ID	Title and scope	Pages	Ver.
SOP-MIG-001	**Lift-and-Shift Migration of a Label Printing Server to the Cloud**. Rehost a BarTender label printing server with AWS Application Migration Service or Azure Migrate, or rebuild it fresh, with tested cutover, printer connectivity and rollback.	27	2.0

2.10 Regulated Lab IT

ID	Title and scope	Pages	Ver.
SOP-LAB-001	**Modernizing a Windows 7 Lab Application onto Windows 11**. Move an instrument-control application off an end-of-life OS in a regulated lab, four ways (direct install with compatibility mode, compatibility shims, an isolated Hyper-V Windows 7…	27	2.0
SOP-LAB-002	**Installing, Registering and Patching a Lab Compliance Data Agent**. A Compliance Builder example: register, install, connect and hotfix a GxP data-capture agent four ways (interactive, silent msiexec + PowerShell, remote via BeyondTrust PRA or…	27	2.0
SOP-LAB-003	**Requesting and Provisioning a Regulated (GxP) Lab Workstation**. From funding to handover and retirement: the ITSM catalog path for a standard build, a qualified (validated) build, a break-fix rebuild and a decommission, with an inventory script and…	26	2.0

2.11 Label Printing

ID	Title and scope	Pages	Ver.
SOP-LBL-001	**Fixing Undersized Labels: Zebra Printer Driver Resolution (DPI) Mismatch**. Diagnose and correct a print-queue driver whose resolution does not match the printhead, four ways (Print Management GUI, a PowerShell base template, PrintUI/pnputil, and print-server…	28	2.0
SOP-LBL-002	**Static IP Reservation and Network Label Printer Integration**. Give a network label printer a permanent address and connect it to Windows, BarTender and the LIMS, four ways: DHCP console reservation, a DhcpServer PowerShell template, static…	23	2.0

2.12 Windows Desktop Support

ID	Title and scope	Pages	Ver.
SOP-WIN-001	**Troubleshooting USB Serial (COM Port) Device Connectivity on Windows**. Diagnose and repair USB-to-serial adapters and COM port assignments five ways: Device Manager, a CMD repair sequence, PowerShell with pnputil, a power-management fix, and Intune…	28	2.0
SOP-WIN-002	**Restoring the DHCP Client Service and Domain Connectivity**. Bring a workstation back from "no network, no domain" four ways: the Services and Event Viewer consoles, sc/ipconfig/nltest at the command line, a PowerShell repair template, and a…	26	2.0
SOP-WIN-003	**Restoring Mapped Network Drive Access on Windows 11**. Recover the Workstation service and SMB client after a configuration change, then re-map drives four ways: Services and Windows Features, sc/net use/cmdkey, PowerShell SMB cmdlets, and…	27	2.0
SOP-WIN-004	**The Windows Command-Line Toolkit for Support Engineers**. A textbook reference to the everyday Windows support commands, each shown in Command Prompt and PowerShell form, then run remotely with Invoke-Command and at scale with Intune Remediations.	24	2.0

CHAPTER 3

Coverage by Framework

Primary control families each procedure supports. The detailed control mapping is in the *Framework references* section at the end of every SOP.

Control family (NIST SP 800-53 Rev. 5)	Procedures
AC · Access Control	ID-001, ID-002, AZ-104, EM-003, AZ-004
IA · Identification and Authentication	ID-001, AZ-001, AZ-004, AZ-104
PS · Personnel Security (onboarding / offboarding)	ID-002
CM · Configuration Management	GOV-001, EM-002, EM-004, EM-005, LAB-001, LAB-003, AZ-101, AZ-102, EP-001
SI · System and Information Integrity	EM-005, SEC-001, EM-001, EP-002, LAB-002
RA · Risk Assessment	SEC-001, AZ-103
IR · Incident Response	SEC-002
AU · Audit and Accountability	AZ-107, SEC-002, GOV-001
CP · Contingency Planning	AZ-005, AZ-003
SC · System and Communications Protection	AZ-002, AZ-004, AZ-106, LBL-002
SA / SR · Acquisition and Supply Chain	AZ-105, GOV-001
CA · Assessment, Authorization and Monitoring	AZ-108, SEC-001 (POA&M)

Regulation or benchmark	Procedures
FDA 21 CFR Part 11 / EU GMP Annex 11 (GxP)	GOV-001, LAB-001, LAB-002, LAB-003, ID-001
CIS Microsoft 365 / Intune benchmarks	ID-001, EM-002, EM-005
CIS Critical Security Controls v8 (Control 7)	SEC-001, EM-005
NIST SP 800-61 (incident handling)	SEC-002
Multi-framework mapping (SOC 2, ISO 27001, PCI DSS, HIPAA)	AZ-108

CHAPTER 4

Change History

4.1 October 2026 · renumbering of the companion Azure series

The landing zone build and assessment series was published with identifiers AZ-001 to AZ-008, which collided with the five Azure procedures. The series moved to the **AZ-1xx** block. Content is unchanged; identifiers, cross-references, footers and file names were updated.

Old ID	New ID	Title
SOP-AZ-001	SOP-AZ-101	Building an Azure Landing Zone as Code
SOP-AZ-002	SOP-AZ-102	Deploying a Repeatable Customer Stamp
SOP-AZ-003	SOP-AZ-103	Threat Modeling an Azure Build with STRIDE
SOP-AZ-004	SOP-AZ-104	Hardening Identity and Access in Azure
SOP-AZ-005	SOP-AZ-105	Scanning for Secrets and Supply-Chain Risk
SOP-AZ-006	SOP-AZ-106	Assessing Network Segmentation and Container Hosting
SOP-AZ-007	SOP-AZ-107	Validating Logging and Proving Every Alert Fires
SOP-AZ-008	SOP-AZ-108	Mapping One Build to Many Compliance Frameworks

NOTE · UNCHANGED IDENTIFIERS

SOP-AZ-001 to SOP-AZ-005 keep their numbers and still refer to the Azure procedures (tenant, hardened VM, cloning, VPN, backup and DR). A reference to *SOP-AZ-004* always means the Point-to-Site VPN procedure.

4.2 October 2026 · procedures added

ID	Title	Pages
SOP-ID-001	Building a Conditional Access and MFA Baseline in Microsoft Entra ID	23
SOP-ID-002	Managing the Joiner-Mover-Leaver Account Lifecycle in Microsoft Entra ID	24
SOP-EM-004	Provisioning Windows Devices with Windows Autopilot and Intune	22
SOP-EM-005	Managing Windows Update Rings and Patch Compliance with Intune	24
SOP-SEC-001	Running a Vulnerability Remediation Program with Qualys and Microsoft Defender	23
SOP-SEC-002	Containing a Compromised Microsoft 365 Account	23
SOP-GOV-001	Change Control and Objective Evidence for GxP and 21 CFR Part 11 Systems	25

4.3 Conventions

- Cross-references cite the SOP identifier only (for example *see SOP-EM-002*), never a file name, so renaming a file never breaks a reference.
- Example tenants, domains and hosts use reserved names such as `contoso.com` and `fs01`.
- A procedure's version increments on any change to steps, scripts or controls; layout-only changes do not change the version.
